

BA/MA/SA/Group:

Your Theory of Blockchains

Are you enthusiastic about blockchain technology? You have new exciting ideas about the theory behind blockchain? We are interested in supervising students with fresh ideas and new perspective on various theoretic topics of blockchain technology.

Designing new systems, proving cryptographic properties, exploring game theoretic aspects, discovering vulnerabilities and attacks, proposing algorithmic solutions, investigating the network structure are some of the topics we are interested in!

Requirements: Bring your idea and enthusiasm!

Interested? Please contact us for more details!
